

**INNOVATION
PERSONIFIED.**

The Original

END TALLY™ TALLY STICK™

**THE FASTEST, MOST MOBILE
WAY TO TALLY LUMBER.
TALLY A BUNDLE IN
UNDER 3 MINUTES!**

Tally your bundles faster and with more mobility than ever before.

Pair with the Tally Stick™ for maximum productivity. No need to transport bundles to a designated location!

Print bundle tags and tally reports wirelessly from your handheld.

PROGRAM OVERVIEW

Length/Width Tally: The easiest and most efficient way to tally export bundles. Simply set up your lengths, species, and grade to start tallying.

Block Tally: Quickly enter your estimated bundles based on their layer count, thickness, length, and pack width.

Recaps: Recall any existing bundle in The End Tally™ to make any adjustments you need to before downloading.

Tags: Wirelessly print tags for your bundles.

Reports: Multiple reports are available to print, from a standard Bundle Tally to a Graphic Tally Report. All the information you need in the palm of your hand.

The Tally Stick™: Achieve optimum mobility by pairing the End Tally program with the Tally Stick™, our wireless digital ruler.

Customized For You: Enter your own grades, species, and more in our fully customizable System Setup.

THE INNOVATOR

The **End Tally™** was the first of its kind to be offered in a mobile, user-friendly device. It began as Forestry System's **first** product geared towards the hardwood lumber industry. Since then it has been perfected, making it the most efficient way to perform a length/width tally.

The **End Tally™** program features step by step prompting, ensuring its interface is flexible and easy to use. Detailed reports outline your tallying results and can be customized to meet your individual needs. Having the most accurate length/width tally program is a necessity to any operation's success. **The End Tally™** is a **must-have** for any hardwood lumber operation, and can work seamlessly with multiple hardware offerings.
