The economic solution to your tallying needs

Compatible with the FSI End Tally™ Program

Lightweight, durable, and a must-have for any operation

The Tally Stick™ delivers unparalleled accuracy and accountability. This digital ruler is completely wireless, and is an affordable mobile tallying solution for operations of all sizes. It is lightweight, durable, and easy to use. No forklifts or maintenance crews are required - just one operator and one stick.

The 18" Tally Stick™ records whole inch measurements with the push of a button. This device wirelessly communicates a board's width, via Bluetooth connection, to any FSI handheld or other existing third party programs. The Tally Stick™ can be used by anyone, regardless of who your vendor is. Tallied data can also be uploaded from your handheld to any inventory system, under multiple supported file formats.
